INFORMAZIONI GENERALI / GENERAL INFORMATION / INFORMATIONS GENERALES / ALLGEMEINE INFOS / INFORMACION GENERAL / ОБЩАЯ ИНФОРМАЦИЯ

IT Le indicazioni contenute in questo catalogo sono state elaborate con la maggior cura possibile, tuttavia non sono vincolanti. I numeri di riferimento dei costruttori di veicoli e di motori sono unicamente richiamati allo scopo di facilitare la comparazione interna senza, peraltro, stabilirne l'originalità. Non possiamo, inoltre, ritenerci responsabili per le variazioni apportate dai costruttori di motori e di veicoli susseguenti all'uscita di questo catalogo. Questo catalogo sostituisce tutte le edizioni precedenti.

EN The indications of this list have been worked out as carefully as possible, however, without liability. Original part numbers of vehicle or engine manufacturers are given for internal comparison only. A possibility also exists that vehicle manufacturers may modify denominations of their products. This catalogue obsoletes all previous publications.

FR Les indications de cette liste ont été élaborées aussi soigneusement que possible, cependant sans obligation. Les références ne sont communiquées qu'à titre de comparaison pour l'utilisation interne à l'exclusion de tout autre objet. Elles n'ont qu'une valeur indicative et peuvent être modifiées à tout moment par les titulaires et à leur gré. Ce catalogue remplace toutes les éditions précédentes.

DE Obwohl die in diesem Katalog enthaltenen Angaben mit größtmöglicher Genauigkeit erstellt wurden, sind sie unverbindlich. Die angeführten Ersatzteilnummern der Fahrzeug- und Motorenhersteller dienen nur zu internen Vergleichszwecken und bedeuten nicht, dass es sich um Originalersatzteile handelt. Darüber hinaus bleiben Änderungen, die von den Herstellern nach Erscheinen dieses Katalogs an Fahrzeugen und Motoren vorgenommen werden, vorbehalten. Mit Erscheinen dieses Katalogs verlieren alle früheren Ausgaben ihre Gültigkeit.

ES Las indicaciones de esta lista fueron elaboradas muy cuidadosamente: sin embargo no son vinculantes. Las referencias originales de los fabricantes de vehículos y motores son indicadas únicamente para usos internos de comparación. También para esta lista se reserva el derecho a modificar las referencias de los motores y vehículos por parte de sus fabricantes o las referencias de filtros. Este catálogo reemplaza todas las ediciones anteriores.

RUS Информация в данном каталоге была подготовлена с максимальной аккуратностью, однако она не обязательна. Ссылки производителей автомобилей и двигателей указываются только для того, чтобы облегчить сравнение, но они не устанавливают оригинальность. Поэтому мы не несём ответственность за изменения, при выходе этого каталога, сделанные производителями двигателей и транспортных средств. Этот каталог заменяет все предыдущие издания.

FILTRI OLIO / OIL FILTER / FILTRE A HUILE
OIL FILTER / FILTRE DE ACEITE / МАСЛЯНЫЕ ФИЛЬТРЫ

IT Una delle condizioni principali per il corretto funzionamento dei motori a scoppio è la costante lubrificazione delle parti meccaniche in movimento con olio privo di impurità (particelle abrasive) dovute alla normale usura degli elementi ed ai residui della combustione. Tali impurità contribuiscono ad aumentare la viscosità dell'olio favorendo l'usura delle parti, aumentando il consumo di carburante e nella peggiore delle ipotesi, procurando danni al motore. Il compito principale del filtro olio è quello di garantire una filtrazione costante nel tempo e di resistere alle sollecitazioni meccaniche e termiche del motore. Il ruolo del filtro è quindi fondamentale per il mantenimento delle prestazioni e della durata di vita del motore. I filtri olio si suddividono in due famiglie:

Spin-on costituiti da un elemento filtrante contenuto in un assieme formato da vaschetta metallica e coperchio all'interno del quale possono essere integrate una "Valvola di non ritorno" (Anti Drain) ed una "valvola di sovrappressione" (BY-PASS).

Cartucce Ecologiche poste direttamente nel circuito di lubrificazione studiate per ridurre al minimo l'impatto ambientale del filtro esausto.

Clean Filters® garantisce un grado di filtrazione equivalente ai prodotti delle più importanti Case Automobilistiche Mondiali in linea con i più severi test internazionali.

EN One of the main conditions for the correct work of internal combustion engines is the constant lubrication of the moving mechanical parts with oil free of impurities (abrasive particles) coming from wear and residues of combustion. These impurities contribute to increased the oil viscosity, the fuel consumption, and the damage of the engine in the worst case. The main task of the oil filter is to guarantee a constant filtration and to withstand the mechanical and thermic stresses of the engine. The role of the filter is therefore crucial to maintain the performance and the life of the engine. Oil filters can be divided into two families: **Spin-on filters** consist in a filtering element contained in an assembly formed by metal pan and a cover. The inside can be integrated with a "check valve" (Anti Drain) and a "overpressure valve" (BY-PASS).

Ecological cartridges are placed directly in the lubrication circuit and are designed to minimize the environmental impact of the exhausted filter.

Clean Filters® provides a filtration level equivalent to that of the most important car manufacturers, guaranteed by the strictest international tests.

FR Une des conditions principales pour un fonctionnement correct des moteurs à explosions est la constante lubrification des éléments mobiles avec de huile privée d'impuretés (particules abrasives) dues à l'usure normale des éléments et aux résidus de la combustion. De telles impuretés contribuent à augmenter la viscosité de l'huile, favorisant l'usure des composants, mais aussi augmentant la consommation en carburant et dans le pire des cas générant des dégâts moteur.

La tâche principale du filtre à huile est de garantir une filtration constante dans le temps et de résister aux sollicitations mécaniques et thermiques du moteur. Le rôle du filtre est donc fondamental pour le maintien des prestations et la durée de vie du moteur. Les filtres à huile se divisent en deux familles:

"A Visser" constitués d'un élément filtrant contenu dans un ensemble formé d'un embouti de tôle métallique en forme de pot et d'un plastron à l'intérieur duquel peuvent être intégrées une «valve anti vidange» (Anti Drain) et/ou d'une «valve de pression» (BY-PASS).

Cartouches écologiques insérées directement dans le circuit de lubrification étudiées pour réduire au maximum leur impact sur l'environnement une fois usées.

Clean Filters® garantit un niveau de filtration équivalent aux produits des plus grands constructeurs mondiaux et ce effectuant les tests les plus sévères préconisés.

DE Eine der wichtigsten Voraussetzungen für den optimalen Betrieb von Verbrennungsmotoren liegt in einer beständigen Schmierung der beweglichen mechanischen Teile. Das Schmieröl muss dabei frei von Verunreinigungen (Feststoffpartikel) sein, die als verschleißbedingter Metallabrieb sowie als Verbrennungsrückstände entstehen. Diese Verunreinigungen erhöhen die Viskosität des Öls und somit auch den Verschleiß der einzelnen Bauteile. Ergebnis ist ein höherer Kraftstoffverbrauch und im schlimmsten Fall ein Motorschaden. Die wichtigste Aufgabe des Ölfilters liegt darin, eine zeitlich beständige Filterleistung zu garantieren und den mechanischen und thermischen Belastungen des Motors stand zu halten. Der Ölfilter spielt also eine grundlegende Rolle, wenn es darum geht, die Motorleistung sowie die Lebensdauer des Motors sicherzustellen.

Ölfilter werden in zwei Gruppen unterteilt:

Wechselfilter bestehen aus einem Filterelement, das seinerseits in einem Metallgehäuse mit Deckel enthalten ist. In dieses Gehäuse können eine „Rücklaufsperr“ (Anti Drain) und ein „Überdruckventil“ (BY-PASS) integriert sein.

Umweltverträgliche Filtereinsätze werden direkt in den Schmierkreislauf eingesetzt und wurden entwickelt, um den verbrauchten Filter so umweltverträglich wie möglich zu machen.

Clean Filters® garantiert einen Filtrationsgrad, der den Produkten der größten Automobilhersteller vollauf gerecht wird und in Einklang mit den strengsten internationalen Prüfverfahren steht.

SP Una de las condiciones principales para el correcto funcionamiento de motores de combustión interna es la lubricación constante de las partes mecánicas en movimiento con aceite libre de impurezas (partículas abrasivas) provocadas por el uso normal de los elementos y por los restos de la combustión. Estas impurezas contribuyen a aumentar la viscosidad del aceite, y a favorecer el desgaste de las partes, lo que aumenta el consumo de combustible y en el peor de los casos provoca daños al motor. La tarea principal del filtro de aceite es de asegurar una filtración constante en el tiempo y de soportar las tensiones mecánicas y térmicas del motor. El rol del filtro es por lo tanto esencial para mantener el rendimiento y la vida útil del motor. Los filtros de aceite se dividen en dos familias:

Spin-on, en los que el elemento filtrante queda contenido en un conjunto compuesto de un contenedor metálico y una tapa, al cuyo interior se puede integrar una "válvula de retención" (anti drenaje) y una "válvula de alivio de presión" (by-pass).

Cartuchos ecológicos colocados directamente en el sistema de lubricación y proyectados para minimizar el impacto del filtro agotado en el medio ambiente.

Clean Filters® proporciona una filtración equivalente a la de los productos de los principales fabricantes de vehículos, de acuerdo con los ensayos internacionales más exigentes.

RUS Одним из важнейших условий правильной работы двигателя внутреннего сгорания является смазка его движущихся частей маслом не содержащим посторонних примесей в Сиде продуктов естественного износа и сгорания.

Эти примеси способствуют повышению вязкости масла, повышенному износу частей двигателя, увеличивают расход топлива, и в худшем случае причиняют ущерб двигателю. Обеспечивать постоянную фильтрацию и снижать воздействие механических и термических нагрузок на двигатель является главной задачей масляных фильтров. Роль фильтров является ключевой для нормальной эксплуатации и долгого срока службы двигателя. Масляные фильтры разделяются на:

Spin-on фильтры. Они сделаны из фильтрующего элемента помещённого в корпус из стального листа. Внутри может быть интегрирован антидренажный клапан (Anti Drain) и перепускной клапан (BY-PASS).

Экологический патрон располагается прямо в цепи смазки и разработан специально для минимизации ущерба окружающей среде при утилизации отработанного фильтра.

Clean Filters® обеспечивает степень фильтрации эквивалентный требованиям ведущих автомобильных производителей, что подтверждено самыми строгими международными тестами.

FILTRO ARIA / AIR FILTER / FILTRE A AIR
LUFTFILTER / FILTRO DE AIRE / ВОЗДУШНЫЕ ФИЛЬТРЫ

IT L'utilizzo di un buon filtro aria è essenziale per il corretto funzionamento del motore. Un motore assorbe da 200 a 500m³ di aria all'ora a seconda delle sue dimensioni. L'aria aspirata è piena di impurità che, a seconda delle condizioni atmosferiche (manto stradale, grado di inquinamento), favorirebbe la creazione di una sorta di pasta abrasiva che, all'interno della camera di combustione, sarebbe causa della formazione di scanalature sui pistoni accorciando la vita del motore.

I filtri Clean Filters[®] garantiscono che l'aria priva di queste impurità arrivi al motore garantendo la giusta miscela aria / carburante ottimizzando i consumi e allo stesso tempo fornendo la giusta protezione delle parti elettroniche e meccaniche (misuratori di portata Aria, guide valvole, sedi valvole) che sono molto sensibili alla presenza di impurità.

I filtri Aria Clean Filters[®] riducono drasticamente la rumorosità in funzionamento grazie alla qualità dei materiali impiegati.

Gli imperativi di maggior potenza, minor consumo e ridotto impatto ambientale hanno richiesto un adeguamento delle prestazioni dei dispositivi ausiliari del motore. In questo ambito il filtro aria ha visto un progressivo incremento delle prestazioni che la Clean Filters[®] garantisce mediante i più severi test di prova internazionali (ES. ISO 5011).

EN The use of a good air filter is essential for the proper functioning of the engine. According to its volume, an engine can absorb from 200 to 500m³ of air per hour. The air absorbed is full of impurities that combined with weather conditions (road surface, pollution levels) could create a kind of abrasive paste in the combustion chamber, which can cause the formation of grooves on the pistons shortening the life of the engine itself. Clean Filters[®] filters purify the air from these impurities, ensure proper air / fuel mixture, optimize fuel consumption and provide the right protection to electronic and mechanical parts (Air Flow, valve guides, valves seats).

Clean Filters[®] air filters dramatically reduce noise thank to the high quality of the materials used. The performances of the auxiliary devices in the engine requested to be conformed to the high standards of greater power, lower consumption and reduced environmental impact. In this context, the performances of Clean Filters[®] air filters have steady increased and tested by the most strict international tests (e.g. ISO 5011).

FR

L'utilisation d'un bon filtre à air est essentielle au bon fonctionnement du moteur. Ce dernier absorbe de 200 à 500m³ à l'heure selon sa taille. L'air aspiré est plein d'impureté qui selon les conditions atmosphérique (revêtement de la chaussée, niveau de pollution) favorise la création d'une sorte de pâte abrasive cause de la formation de rayures sur les pistons réduisant la vie du moteur.

Les filtres Clean Filters® garantissent que l'air privé de ces impuretés arrive au moteur garantissant le juste mélange air/carburant optimisant la consommation et fournissant en même temps la juste protection des composants électroniques et mécaniques (Débitmètre d'air, guide et siège de soupape) qui sont très sensibles à la présence d'impuretés.

Les filtres à air Clean Filters® réduisent drastiquement le bruit en fonctionnement grâce à la qualité des matériaux utilisés.

Les impératifs pour plus de puissance, la réduction de la consommation et de l'impact sur l'environnement ont engendré un réajustement des prestations des dispositifs auxiliaires moteur. Dans cette optique le filtre à air a subi une augmentation progressive de ses prestations que Clean Filters® garantit au moyen des tests sévères conformes aux normes internationales (ex. ISO 5011).

DE

Ein guter Luftfilter gilt als grundlegende Voraussetzung für einen störungsfreien Motorenbetrieb. Je nach Größe saugt ein Motor pro Stunde rund 200 bis 500 m³ Luft an. Diese Luft weist eine Vielzahl von Verunreinigungen auf, die je nach Umweltbedingungen (Straßenbelag, Grad der Umweltverschmutzung) eine Art Schleifpaste entstehen lassen würden, die im Inneren der Brennkammer wiederum zur Ausformung von Rillen auf den Kolben führen und die Lebensdauer des Motors so stark einschränken würde. Die Luftfilter von Clean Filters® garantieren dafür, dass nur sauberere Luft in den Motor gelangt und sorgen so für ein optimales Mischungsverhältnis aus Luft und Kraftstoff. So kann nicht nur der Kraftstoffverbrauch optimiert, sondern gleichzeitig auch ein idealer Schutz für elektronische und mechanische Bauteile, die oft sehr sensibel auf das Vorhandensein von Verunreinigungen reagieren, geboten werden (Luftmassenmesser, Ventilführungen, Ventilsitze). Dank der Qualität der verwendeten Materialien kann mit den Luftfiltern von Clean Filters® der Betriebslärm deutlich gesenkt werden. Das Streben nach mehr Leistung bei geringerem Verbrauch und höherer Umweltverträglichkeit hat zu einer leistungsorientierten Anpassung der Hilfseinrichtungen von Motoren geführt. Im Rahmen dieser Entwicklung werden auch an den Luftfilter immer höhere Leistungsansprüche gestellt, denen die Produkte Clean Filters® dank strengster internationaler Prüfverfahren (z.B. ISO 5011) vollauf gerecht werden.

SP

El uso de un buen filtro de aire es fundamental para el buen funcionamiento del motor. Un motor absorbe entre 200 y 500 m³ de aire por hora, según su tamaño. El aire aspirado está lleno de impurezas que, dependiendo de las condiciones climáticas (superficie del camino, el grado de contaminación) podría favorecer la creación de una especie de polvo abrasivo que dentro de la cámara de combustión provocaría la formación de ranuras en los pistones acortando así la vida del motor. Los Filtros Clean Filters® aseguran que el aire libre de estas impurezas llegue al motor asegurando la mezcla de aire / combustible correcta y optimizando el consumo de combustible y, al mismo tiempo, garantizando la protección adecuada de las partes electrónicas y mecánicas (medidor del flujo de aire, válvulas guía, asientos de válvulas) que son muy sensibles a la presencia de impurezas. Los Filtros de aire Clean Filters® reducen considerablemente el ruido de funcionamiento gracias a la calidad de los materiales utilizados. Necesidad de mayor potencia, menor consumo y menor impacto ambiental requirieron una puesta al día del rendimiento de los aparatos auxiliares del motor. En este tema, el filtro de aire vió un incremento constante en su rendimiento, que Clean Filters® asegura por medio de los ensayos más duros requeridos por las normas internacionales (por ejemplo, ISO 5011).

RUS

Использование качественного воздушного фильтра имеет огромное значение для правильного функционирования двигателя. Двигатель потребляет от 200 до 500 м³ воздуха в час в зависимости от его объема. Посторонние примеси содержащиеся во всасываемом воздухе способствуют возникновению в камере сгорания абразивной пасты создающей задиры в поршневой группе, которые сокращают жизнь двигателя.

Фильтры Clean filters® очищают воздух от вредных примесей и обеспечивают правильную смесь воздух-топливо, оптимизируют расход и защищают электронные и механические части (расходомеры воздуха, клапанные механизмы).

Воздушные фильтры Clean filters® также значительно снижают уровень шума благодаря высокому качеству используемых материалов.

Современные требования по увеличению мощности, снижения расхода топлива и воздействия на окружающую среду потребовали усложнения конструкции двигателей, что в свою очередь ужесточает требования к их комплектующим.

В связи с этим, конструкция воздушных фильтров Clean filters® постоянно улучшается и соответствует самым строгим нормам (напр. ISO 5011)

**FILTRI CARBURANTE / FUEL FILTER / FILTRE A CARBURANT
FUEL FILTER / FILTRO DE COMBUSTIBLE / ТОПЛИВНЫЙ ФИЛЬТР**

IT Il filtro carburante assicura la protezione del sistema di alimentazione del motore (carburatore o iniettore) eliminando le impurità e le particelle di acqua presenti nei combustibili. Il carburante giunge nel sistema di iniezione o nel carburatore tramite una pompa. Nei più moderni sistemi d'iniezione la presenza di impurità nel combustibile aumenta l'usura con un conseguente aumento dei consumi del veicolo, della fumosità allo scarico portando nel peggiore dei casi perfino all'avaria del sistema d'iniezione.

I più moderni sistemi di iniezione quali il Common Rail hanno bisogno di soluzioni innovative nel campo della filtrazione perché particolarmente sensibili alla presenza di impurità e di particelle di acqua nel carburante. Clean Filters® ha raccolto la sfida fornendo una gamma completa di filtri carburante, che utilizzando lo studio di media filtranti all'avanguardia (cellulosa, accoppiato cellulosa sintetico, 100% sintetico, struttura a gradiente di filtrazione) ha permesso alla Nostra Azienda di soddisfare le richieste dei maggiori costruttori di veicoli.

Clean Filters® garantisce la massima protezione e le migliori performance del motore. La gamma di filtri "DNW" assicurano il più elevato standard possibile di separazione dei residui d'acqua dal carburante (superiore al 95%) e hanno ottime capacità di filtrazione del contaminante.

EN Fuel filters protect the fuel system (carburetor or injector) removing impurities and particles of water in fuel that reaches the injection system or the carburetor passing through a pump. In more modern injection systems the level of impurities raises the wear, increases the consumption and the exhaust smoke, and can even damage the injection system in the worst cases.

The most modern injection systems, such as common rail, need innovative filtering solutions, as they are particularly sensitive to the presence of impurities and particles of water in the fuel. Clean Filters® provides a complete range of fuel filters, which use advanced filtering media (cellulose, mixture cellulose-synthetic, 100% synthetic, filtration gradient texture), and satisfies the requests of the major vehicle manufacturers. Clean Filters® provides greater protection and best performance to the engine. The range of filters "DNW" guarantees the highest level of separation of water residues from the fuel (more than 95%) and has excellent filtration power.

FR Le filtre à carburant assure la protection du système d'alimentation du moteur (carburateur ou injecteur) éliminant les impuretés et les particules d'eau présentes dans le combustible. Le carburant parvient au système d'injection ou au carburateur au moyen d'une pompe. Dans les plus modernes systèmes d'injection la présence d'impuretés dans le combustible augmente l'usure ainsi que la consommation du véhicule, mais aussi la densité de la fumée des gaz d'échappement et dans le pire des cas à l'avarie du système d'injection. Les plus récents systèmes d'injection dont le Common Rail ont besoin de solutions innovatrices dans le domaine de la filtration car celui-ci est très sensible à la présence d'impuretés et de particules d'eau dans le carburant. Clean Filters® a relevé le défi en créant une gamme complète de filtres à carburant, utilisant des médias filtrants d'avant-garde (cellulose associée au synthétique, 100% synthétique, structure à niveaux de filtration) qui ont permis à notre société de satisfaire aux exigences des demandes de nos clients constructeurs. Clean Filters® garantit une protection maximum et les meilleures performances du moteur. La gamme de filtres «DNW» assure la plus élevée séparation des particules d'eau présentes dans le carburant (supérieure à 95%) et ont une capacité de filtration du contaminant optimale.

DE Der Kraftstofffilter schützt das System zur Kraftstoffversorgung des Motors (Vergaser oder Einspritzdüse), indem die im Kraftstoff enthaltenen Verunreinigungen und Wasserpartikel gefiltert werden. Der Kraftstoff gelangt über eine Kraftstoffpumpe in das Einspritzsystem oder zum Vergaser. Bei modernen Einspritzsystemen sorgen Verunreinigungen im Kraftstoff für höheren Verschleiß, einen folglich höheren Kraftstoffverbrauch des Fahrzeugs sowie Rauchbildung am Auspuff und können im schlimmsten Fall sogar zum Defekt des Einspritzsystems führen. Moderne Einspritzsysteme wie die Common-Rail-Einspritzung bedürfen innovativer Filterlösungen, da sie überaus empfindlich auf das Vorhandensein von Verunreinigungen und Wasserpartikeln im Kraftstoff reagieren. Bei Clean Filters® hat man sich dieser Herausforderung gestellt und ein komplettes Angebot im Bereich Kraftstofffilter entwickelt, wobei die fortschrittlichsten Filtermedien zum Einsatz kommen (Zellulose, Mischfaser Zellulose/Synthetische Faser, 100% synthetische Faser, Stufenfiltration). All dies hat es unserem Unternehmen ermöglicht, die Anforderungen und Ansprüche der größten Fahrzeughersteller zufriedenzustellen. Clean Filters® garantieren für höchsten Schutz und beste Motorenleistung. Filter aus der Produktreihe „DNW“ sorgen dabei für höchste Standards bei der Trennung des im Kraftstoff gebundenen Wassers (mehr als 95%) und verfügen über ausgezeichnete Filterleistung bei der Schadstoffbindung.

SP El filtro de combustible asegura la protección del sistema de alimentación del motor (carburador o inyectores) eliminando las impurezas y las partículas de agua que se encuentran en los combustibles. El combustible llega al sistema de inyección o al carburador a través de una bomba. En los sistemas de inyección más modernos la presencia de impurezas en un combustible aumenta el desgaste que tiene como resultado un aumento en los consumos del vehículo, humo de escape y en el peor de los casos hasta que el sistema de inyectores se bloquee. Los más modernos sistemas de inyección de tipo common rail, precisan soluciones innovadoras en el campo de la filtración, ya que son muy sensibles a la presencia de impurezas y partículas de agua en el combustible. Clean Filters® aceptó el reto de ofrecer una gama completa de filtros de combustible, que aprovechando del estudio de los medios de filtración avanzados (celulosa, acoplado celulosa y sintético, 100% sintético, filtración gradual de textura sintética) ha permitido a nuestra empresa responder de forma positiva a los requerimientos de los principales fabricantes de vehículos. Los Filtros Clean Filters® brindan la máxima protección y el mejor rendimiento del motor. La gama de filtros "DNW" aseguran el nivel más alto posible de separación de restos de agua del combustible (por encima de 95%) y tienen una excelente capacidad de filtración del contaminante.

RUS Топливный фильтр является важнейшим элементом, предотвращающим попадание посторонних примесей и воды в систему подачи и впрыска топлива. Самым современным системам впрыска, таким как Common Rail, нужны инновационные решения в сфере фильтрации, т.к. они особенно чувствительны к наличию примесей и частиц воды в топливе. Clean filters® удовлетворяет требованиям крупнейший производителей транспортных средств, поставляя широкий ассортимент топлива, производимого из самых современных материалов (целлюлоза, смесь целлюлозы с синтетикой, 100% синтетики) Clean filters® надёжно защищает двигатель и обеспечивает самую лучшую эксплуатацию. Линейка фильтров "DNW" обеспечивает высокий уровень удаления остатков воды из топлива (выше 95%) и максимальный уровень фильтрации загрязняющих частиц.

FILTRI ABITACOLO / CABIN FILTER / FILTRE A CARBURANT
KABINENFILTER / FILTROS HABITÁCULO / САЛОННЫЙ ФИЛЬТ

IT I filtri abitacolo Clean Filters® sono una barriera importante per impedire agli agenti inquinanti, quali gas di scarico, pulviscolo, pollini, polveri sottili di penetrare nell'abitacolo e concentrarsi con valori fino a 6 volte superiori rispetto al normale livello di inquinamento dell'ambiente esterno. Le prolungate esposizioni all'alta concentrazione degli agenti inquinanti possono provocare danni importanti alla salute dei passeggeri. Le impurità che possono entrare nell'abitacolo sono invisibili a occhio nudo, presentano dimensioni inferiori ai 5 micron di diametro. La fibra che costituisce la parte filtrante del filtro e la relativa struttura consentono di trattenere particelle della dimensione di un 1 micron. Clean Filters® garantisce sempre aria pulita all'interno dell'abitacolo evitando la formazione della pericolosa pellicola di lubrificanti sui vetri, creando quindi condizioni di maggiore sicurezza per chi si trova alla guida. Clean Filters® agisce con la stessa efficacia sia alle alte, che alle basse temperature ed è perfettamente intercambiabile all'originale. Lo schema di smontaggio e montaggio "fai da te", contenuto nella confezione, rende agevole la sua sostituzione. Il cambio del filtro garantisce le migliori prestazioni d'esercizio con una circolazione d'aria all'interno dell'abitacolo di buona qualità e contribuisce a creare un ambiente salutare e gradevole per i passeggeri.

EN Clean Filters® Cabin filters are an important barrier, which prevents contaminants, such as exhaust gas, dust and pollens to penetrate in the passenger compartment and to concentrate in values even 6 times higher than the normal level of pollution in external environment. Prolonged exposure to high concentrations of pollutants can cause serious damages to the health of passengers. The impurities that may enter the passenger compartment are invisible to the naked eye, as they are smaller than 5 microns in diameter. The fiber in the filtering part of the filter and the filter structure allow to retain 1 micron big particles. Clean Filters® guarantee clean air inside the passenger compartment, avoid the formation of dangerous film of lubricants on the glass, and create conditions of greater safety for the drivers. Clean Filters® works with the same efficiency both at high and low temperatures and are fully interchangeable with the original. The scheme of mounting "do it yourself" in the package helps you in replacing the filter. The changing of the filter guarantees best performances, circulation of air, and helps to create a healthy and pleasant environment for passengers.

FR Les filtres d'habitacles Clean Filters® sont une barrière importante pour empêcher les agents polluants, comme les gaz d'échappement, la poussière, les pollens, les poussières fines de pénétrer dans l'habitacle et de se concentrer jusqu'à des valeurs 6 fois supérieures au niveau normal de pollution de l'environnement extérieur. Les expositions prolongées à une haute concentration d'agents polluants peuvent engendrer des dommages importants sur la santé des passagers. Les impuretés qui peuvent entrer dans l'habitacle sont invisibles à l'œil nu, elles sont inférieures à 5 microns. La fibre qui constitue la partie filtrante du filtre et sa structure lui permettent de retenir des particules d'une dimension d'un micron. Clean Filters® garantit toujours de l'air propre dans l'habitacle évitant la formation de la dangereuse pellicule de lubrifiant sur les vitres, créant ainsi les meilleures conditions de sécurité pour le conducteur. Clean Filters® agit avec la même efficacité aussi bien à haute qu'à basse température et il est parfaitement interchangeable avec l'original. La fiche d'instructions de démontage et de montage «do it yourself» contenu dans la boîte rend facile son remplacement. La substitution du filtre garantit les meilleures prestations avec une circulation d'air à l'intérieur de l'habitacle de bonne qualité et contribue à créer un environnement salubre et agréable pour les passagers.

DE Die Innenraumfilter von Clean Filters® stellen eine wichtige Schutzbarriere dar, um zu verhindern, dass Verunreinigungen wie Abgase, Staub, Pollen und Feinstaub in den Fahrzeuginnenraum eindringen und sich hier zu einer Konzentration verdichten, die oft sechsmal so stark ist wie der Grad der normalen Umweltverschmutzung außerhalb des Fahrzeugs. Sind die Fahrgäste dieser hohen Konzentration an Schadstoffen und Verunreinigungen über längere Zeit ausgesetzt, kann dies zu schweren Gesundheitsschäden führen. Mit einem Durchmesser von weniger als 5 Mikrometern sind die ins Fahrzeug eindringenden Verunreinigungen dabei mit bloßem Auge nicht erkennbar. Die das Filtermedium bildenden Fasern ermöglichen zusammen mit der entsprechenden Struktur das Filtern von Partikeln mit einer Größe von 1 Mikrometer. Clean Filters® garantieren für stets saubere Luft im Fahrzeuginnenraum, wodurch auch die Bildung eines gefährlichen Schmierfilms an der Windschutzscheiben vermieden und damit die Voraussetzung für eine höhere Sicherheit des Fahrers geschaffen werden kann. Innenraumfilter von Clean Filters® arbeiten sowohl bei hohen als auch niedrigen Temperaturen mit gleicher Filterleistung und bilden einen vollwertigen Ersatz zum Originalteil. Jede Verpackung enthält eine leicht verständliche Anleitung, mit Hilfe derer jeder Filter problemlos selbst ein- und ausgebaut werden kann. Das Austauschen des Filters garantiert nicht nur für eine optimale Leistung sondern auch für eine qualitativ hochwertige Luftzirkulation im Fahrgastraum und trägt so zu einem gesunden und angenehmen Umfeld für die Fahrgäste bei.

SP Los filtros de aire para habitáculo Clean Filters® son una barrera importante para evitar que los contaminantes como el gas de escape, polvo, polen, polvo fino entren al interior de la habitáculos y allí lleguen a una concentración hasta 6 veces más alta que el nivel normal de la contaminación del medio exterior. La exposición prolongada a la alta concentración de contaminantes puede provocar graves daños a la salud de los pasajeros. Las impurezas que pueden entrar en el vehículo son invisibles a simple vista, teniendo un diámetro menor que 5 micras. La fibra que constituye la parte filtrante del filtro y su estructura permite retener las partículas de hasta un tamaño de 1 micra. Clean Filters® proporcionan aire limpio en todo el interior del vehículo y evitan la formación del peligroso film película lubricante en el cristal, creando así las condiciones para más seguridad para quien están conduciendo. Clean Filters® funcionan con la misma eficacia en las temperaturas altas y en las bajas, y resultan totalmente intercambiables con los originales. El esquema de desmontaje y montaje de estilo "hágalo Usted mismo" que acompaña cada caja hace que la substitución sea sencilla. Cambiar el filtro proporciona el mejor rendimiento de utilización junto a una circulación de aire de buena calidad dentro del vehículo y contribuye a crear un ambiente saludable y agradable para los pasajeros.

RUS Салонные фильтры Clean Filters® являются важным барьером, задерживающим загрязняющие вещества, выхлопные газы, промышленную пыль, пыльцу и споры, которые могут концентрироваться в салоне со значениями на 6 раз выше чем в наружной среде. Высокая концентрация загрязняющих веществ может причинить большой ущерб здоровью пассажиров. Примеси попадающие в салон автомобиля невидимы невооружённым глазом, т.к. размер их частиц не достигает и 5-и микрон в диаметре. Волокна в фильтрующей части фильтра задерживают частицы размером до 1 микрона. Салонные фильтры Clean Filters® обеспечивают чистоту воздуха в салоне, предотвращают образования вредного налёта на стёклах. Салонные фильтры Clean Filters® эффективно работают как при и высоких, так и при низких температурах, полностью взаимозаменяемы оригинальными фильтрами. Каждый фильтр индивидуально упакован и снабжён схематичной инструкцией по установке, что значительно упрощает его замену. Регулярная замена салонного фильтра обеспечивает оптимальный тепловой режим и хорошую циркуляцию воздуха по салону, и помогает создать здоровую и приятную среду для пассажиров.

FILTRI GAS / GAS FILTER / GAZ FILTRE
GASFILTER / FILTRO DE GAS / ГАЗОВЫЙ ФИЛЬТР

IT Negli ultimi anni l'esigenza di avere ridotte emissioni, bassi consumi e limitato impatto ambientale, ha fatto sì che i motori alimentati da combustibili alternativi (Metano o GPL) riscuotessero sempre più successo fra gli automobilisti. Come noto i combustibili gassosi sono preferibili rispetto a quelli tradizionali in quanto, all'atto della combustione, emettono ridotte quantità di zolfo, particolato e residui carboniosi, risultando così "Eco-Friendly". Per questo motivo è sempre più importante salvaguardare il funzionamento degli iniettori eliminando le impurità presenti nel gas.

La serie "MPG" di Clean Filters® è il risultato di un profondo studio dei materiali impiegati, che permette la massima protezione dell'impianto d'iniezione, aumentando la longevità del motore.

Considerando la natura del GPL, miscela di butano e propano, è necessario prestare particolare attenzione agli aspetti della sicurezza, per questo il Ministero dei Trasporti richiede il rispetto della normativa vigente. La serie "MPG" di Clean Filters® ha ottenuto l'omologazione secondo il regolamento Europeo ECE/ONU 67R/01 classe 2A.

EN In recent years the engines powered by alternative fuels (natural gas or LPG) have been having more and more success, thanks to their low emissions, low fuel consumption and low environmental impact. In fact gaseous fuels are preferable to the traditional ones because during combustion the emissions of sulfur, particulate and carbon residue are lower, and the whole system can be considered "Eco-Friendly". For this reason, it is necessary to protect the injectors eliminating the impurities from the gas.

The series "MPG" of Clean Filters® is the result of a careful study of the materials used, and protects the injection system by increasing the longevity of the engine.

Considering that LPG is the result of a mixture of butane and propane, particular attention should be paid to the safety aspects required by the legislation in force. The series "MPG" Clean Filters® filters received the approval according to the European regulation ECE / ONU 67R/01 Class 2A.

FR Ces dernières années l'exigence d'avoir des émissions polluantes et une consommation réduites ont fait que les moteurs à combustibles alternatifs (Méthane ou GPL) rencontrent de plus en plus de succès auprès des automobilistes. Comme nous le savons, les combustibles gazeux dits «Eco-Friendly» sont préférables à ceux traditionnels car durant la combustion ils émettent une quantité réduite de soufre, de particules et de résidus carbonés. Pour cette raison il est très important de sauvegarder le fonctionnement des injecteurs en éliminant les impuretés présentes dans les gaz.

La série «MPG» de Clean Filters® est le résultat d'une étude approfondie des matériaux utilisés qui permettent la protection maximale du système d'injection tout en augmentant la longévité du moteur.

Considérant la nature du GPL, mélange de butane et de propane, il est nécessaire de prêter attention à l'aspect sécurité, pour cela les divers Ministères des Transports demandent de respecter les normes en vigueur. La série «MPG» de Clean Filters® a obtenu l'homologation selon le règlement européen ECE/ONU 67R/01 classe 2A.

DE Der Wunsch nach geringeren Abgasemissionen, niedrigerem Verbrauch und höherer Umweltverträglichkeit hat in den letzten Jahren dafür gesorgt, dass sich immer mehr Menschen für Fahrzeuge mit alternativer Antriebstechnik (Erdgas oder Flüssiggas) entscheiden. Wie bekannt sind gasförmige Kraftstoffe den traditionellen Kraftstoffen vor allem deshalb vorzuziehen, da sie bei der Verbrennung geringere Mengen Schwefel, Feinstaub und unverbrannte Kohlenwasserstoffe freisetzen und somit als „Eco-Friendly“ gelten. Aus diesem Grund wird es immer wichtiger, die korrekte Funktionsweise der Einspritzdüsen zu schützen, indem die im Gas enthaltenen Verunreinigungen entfernt werden.

Die Produktreihe „MPG“ von Clean Filters® ist das Ergebnis einer tiefgreifenden Materialstudie: Die verwendeten Materialien sorgen für höchsten Schutz der Einspritzanlage und erhöhen so die Lebensdauer des Motors.

Da Flüssiggas – als Gemisch aus Butan und Propan - aufgrund seiner natürlichen Eigenschaften besondere Maßnahmen in Sachen Sicherheit verlangt, müssen laut italienischem Verkehrsministerium alle geltenden Richtlinien eingehalten werden.

Die Produktreihe „MPG“ von Clean Filters® wurde gemäß der europäischen Regelung ECE-R 67/1 Klasse 2A zugelassen.

SP En los últimos años la necesidad de alcanzar mínimas emisiones y bajo consumo de combustible y bajo impacto en el medio ambiente, ha hecho que los motores alimentados por combustibles alternativos (gas natural GNC o GLP) estén alcanzando siempre más éxito entre los automovilistas.

Por ser preferibles frente a las tradicionales en la combustión, los combustibles alternativos emiten cantidades mínimas de azufre, de partículas y restos de carbono, por lo cual resultan ser “Eco-Amigables”. Por esta razón, es cada vez más importante proteger la operación de los inyectores eliminando las impurezas en el gas. La serie “MPG” de Clean Filters® es el resultado de un estudio profundo sobre los materiales utilizados que permite la máxima protección del sistema de inyección alargando al mismo tiempo la vida útil del motor.

Teniendo en cuenta la naturaleza del GPL, una mezcla de butano y propano, es necesario poner especial atención en los aspectos de seguridad, por lo que los distintos Ministerios de Transporte exigen el cumplimiento de las normas locales. La serie “MPG” de Clean Filtersos® ha logrado la homologación de conformidad con la norma ECE / ONU 67R/01 clase 2A.

RUS В последнее время всё большую популярность приобретают двигатели работающие на альтернативных видах топлива (природном или сжиженном газе). Газ, в качестве топлива, предпочтительнее традиционных видов топлива, т.к. при его сгорании в воздух попадает меньше серных частиц и углекислого газа, т.е. газ является “экологичным топливом”.

Но для нормальной работы системы газ не должен содержать посторонних примесей. Именно для этого была разработана серия “MPG” от Clean Filters®, которая является результатом тщательного подбора материалов, которые обеспечивают максимальную защиту системы впрыска и увеличивают долговечность двигателя работающего на газе.

Сжиженный газ получают из смеси бутана с пропаном, поэтому необходимо обратить особое внимание на безопасность. Серия “MPG” сертифицирована по европейскому закону ECE/ONU 67R/01 classe 2A.

IT La DELGROSSO S.p.A. sviluppa, produce e commercializza filtri per autoveicoli sia per il primo equipaggiamento che per l'aftermarket. La DELGROSSO S.p.A. dichiara, ai sensi del decreto BER 461/2010 "Block Exemption Regulation" ratificato dalla commissione Europea, che gli standard qualitativi della gamma Clean Filters® sono creati per garantire piena intercambiabilità tecnica, dimensionale e funzionale rispetto ai corrispondenti particolari di ricambio originali. La DELGROSSO S.p.A. comunica inoltre che i filtri Clean Filters® possono essere impiegati per le riparazioni e le manutenzioni dei veicoli anche durante il periodo di garanzia senza che tale impiego possa costituire ragione per la revoca delle garanzie del Costruttore.

EN DELGROSSO S.p.A. develops, manufactures and supplies automotive filters for both original equipment and the aftermarket sectors. DELGROSSO S.p.A. declares, according to the Decree BER 461/2010 ("Block Exemption Regulation") ratified by the European Commission, that the quality standards of the Clean Filters® range are designed to grant that products are fully interchangeable with original spare parts, in any technical, dimensional and functional aspect. DELGROSSO S.p.A. furthermore informs that all part numbers by Clean Filters® can be used to repair and carry on maintenance of vehicles even during the warranty period, without such an use to constitute reason for the cancellation of any manufacturer's guarantee.

FR La société DELGROSSO S.p.A. développe, produit et commercialise des filtres pour véhicules aussi bien pour la Première Monte Originale que pour l'après-vente. La société DELGROSSO S.p.A. déclare, que selon le décret BER 461/2010 «Block Exemption Regulation» ratifié par la Commission européenne, que les standards qualitatifs de la gamme Clean Filters® sont créés pour garantir la pleine interchangeabilité technique, dimensionnelle et fonctionnelle par rapport aux correspondants de la rechange originale. La DELGROSSO S.p.A. informe que les filtres Clean filters® peuvent être employés pour les réparations et la manutention des véhicules et ce, même durant la période de garantie sans que cela puisse constituer un motif de révocation des garanties du constructeur.

DE Das Unternehmen DELGROSSO S.p.A. entwickelt, produziert und vertreibt Filter und Filtereinsätze für Kraftfahrzeuge, die sowohl zur Erstausrüstung als auch am Ersatzteilmarkt angeboten werden. Gemäß der von der europäischen Kommission erlassenen Gruppenfreistellungserklärung VO 461/2010 bestätigt die DELGROSSO SpA, die Qualitätsstandards von Clean Filters® so angesetzt zu haben, dass die Filter sowohl bei technischen und funktionalen Anforderungen als auch hinsichtlich der Abmessungen einen garantiert vollwertigen Ersatz zu den Originalersatzteilen darstellen. Das Unternehmen DELGROSSO SpA erklärt darüber hinaus, dass die Filter von Clean Filters® auch während des Garantiezeitraums für Reparatur und Wartung der Kraftfahrzeuge verwendet werden können, ohne dass daraus ein Grund für den Widerruf der Herstellergarantie entsteht.

ES DELGROSSO S.p.A. desarrolla, fabrica y comercializa filtros para autovehículos, para los equipos originales así como el mercado de recambios. DELGROSSO S.p.A. declara, en conformidad con el Decreto BER 461/2010 "Reglamento de exención" ratificado por la Comisión Europea, que las normas de calidad de los filtros de la gama Clean filters® están proyectados para garantizar la total intercambiabilidad técnica, dimensional y funcional con los recambios originales. DELGROSSO S.p.A. además informa que los filtros Clean Filters® se pueden utilizar para la reparación y el mantenimiento de vehículos, incluso en el plazo de garantía, sin que esto pueda traer como consecuencia cancelación de las garantías del fabricante.

RUS DelGrosso С.п.А. разрабатывает, производит и поставляет для рынка автомобильные фильтры как для первичной оснастки, так и запчасти для сервиса после продажи. DelGrosso С.п.А. заявляет, в соответствии с декретом BER 461/2010 "Block Exemption Regulation" ратифицированным Европейской Комиссией, что стандарты качества ассортимента Clean filters® обеспечивают полную взаимозаменяемость технических, габаритных и функциональных характеристик относительно соответствующих деталей оригинальных запчастей. DelGrosso S.p.A. ставит в известность, что фильтры Clean filters® могут использоваться при ремонте и обслуживании транспортных средств, также в течение гарантийного срока не вызывая отмену гарантии Производителя.

GARANZIA DEL PRODOTTO / PRODUCT GUARANTEE / GARANTIE PRODUIT / PRODUKT GARANTIE / GARANTIA DE PRODUCTO / ГАРАНТИЯ НА ПРОДУК

IT Tutti i filtri prodotti dalla DELGROSSO S.p.A. corrispondono a tutte le caratteristiche tecniche più recenti stabilite dai fabbricanti di veicoli. La DELGROSSO S.p.A. garantisce la qualità ed il risultato tecnico di ogni filtro CLEAN e si assume la responsabilità di danni eventuali che possano essere attribuiti direttamente ad un cattivo funzionamento dei filtri, sempre che le istruzioni di montaggio siano eseguite scrupolosamente. Allo scopo di applicare le leggi europee che si riferiscono alla responsabilità civile contro gli incidenti, la DELGROSSO S.p.A. copre tutti i suoi filtri per mezzo di una polizza di assicurazione della Società TORO ASSICURAZIONI, verso tutti i danni nella eventualità di reclami contro i prodotti della DELGROSSO S.p.A. Nel caso di problemi causati dai filtri CLEAN, è necessario l'invio di una relazione tecnica circa i danni avvenuti, assieme alla restituzione dei filtri oggetto di contestazione, per permettere al nostro laboratorio tecnico di eseguire le verifiche tecniche necessarie ed eventualmente istruire la compagnia di assicurazioni. La mancanza di uno di questi elementi non obbliga ne crea responsabilità nei confronti della DELGROSSO S.p.A., di suoi agenti o rappresentanti.

EN All filters produced by DELGROSSO S.p.A. conform to all the latest production standards issued by the major vehicle manufacturers DELGROSSO S.p.A. vouch for the quality and the technical performance of each and every CLEAN-Filter and undertake the responsibility for damages which can be directly attributed to the malfunction of a CLEAN-Filter, provided that the fitting instructions issued by DELGROSSO S.p.A. are fully complied with. In order to comply with the European laws on tort liability DELGROSSO S.p.A. maintain product liability insurance on all their filters through the insurance company TORO ASSICURAZIONI against all damages in case of claims against DELGROSSO S.p.A. products. Should any problem arise, caused by CLEAN-Filters, a technical report on the ascertained damages, together with the faulty filter must of necessity be sent to DELGROSSO S.p.A. to enable their Technical Laboratory to carry out the necessary tests and consequently instruct the insurance company in the matter of damage refund, if the case requires. Failure to send such a technical report and to return the filter in question, automatically absolves DELGROSSO S.p.A., its agents or representatives, from any obligation or liability in the matter.

FR Tous les produits fabriqués par DELGROSSO S.p.A. sont garantis conformes aux conditions de garantie des fabricants de véhicules. DELGROSSO S.p.A. garantit la qualité et les performances de chaque produit CLEAN et accepte la responsabilité pour tout endommagement du moteur qui peut être attribué directement et seulement à un mauvais fonctionnement d'un produit CLEAN, mais à conditions que les normes standard de montage soient soigneusement respectées. Pour être en conformité avec les directives européennes relatives à la responsabilité civile produit, nous avons souscrit, auprès de la Compagnie d'Assurance Italienne TORO ASSICURAZIONI un contrat couvrant notre responsabilité civile relative aux produits que nous fabriquons et distribuons sous la marque CLEAN. Si jamais notre responsabilité venait à être engagée et si nous étions inculpés suite à une malfaçon d'un produit de notre fabrication, il nous est indispensable d'avoir la pièce defectueuse avec une relation technique des dommages causés afin d'effectuer nos essais techniques et de demander le remboursement des dommages à notre compagnie d'assurance. Aucune réclamation déposée sans le support de la pièce défectueuse et la relation technique des dommages causés ne pourra être prise en consideration.

DE Alle vom Unternehmen DELGROSSO S.p.A. hergestellten Filter entsprechen den aktuellsten technischen Anforderungen der Fahrzeughersteller. Das Unternehmen DELGROSSO S.p.A. gewährleistet die Qualität und das technische Ergebnis jedes CLEAN-Filters und übernimmt die Haftung für eventuelle Schäden, die direkt auf eine mangelnde Funktionsweise der Filter zurückzuführen sind, vorausgesetzt dass die Montageanleitung bei ihrem Einbau strengstens befolgt wurde. Um die Einhaltung der europäischen Gesetzgebung in Bezug auf die Haftpflicht bei Unfällen zu garantieren, unterliegen alle Filter der DELGROSSO S.p.A. dem Versicherungsschutz durch die Versicherungsgesellschaft TORO ASSICURAZIONI, der das Unternehmen DELGROSSO S.p.A. bei eventuellen Beschwerden gegen seine Produkte gegen alle Schäden abdeckt. Falls es aufgrund der CLEAN-Filter zu Problemen kommen sollte, müssen dem Unternehmen zusammen mit einem technischen Bericht über den Schadensfall auch die von der Beschwerde betroffenen Filter zurückgeschickt werden, um dem technischen Labor des Unternehmens die Möglichkeit zu bieten, die notwendigen technischen Prüfungen vorzunehmen und gegebenenfalls die Versicherungsgesellschaft zu informieren. In Ermangelung eines dieser Elemente entsteht für die Vertreter und Handelspartner keine Haftung gegenüber dem Unternehmen DELGROSSO S.p.A.

ES Todos los filtros producidos por DELGROSSO S.p.A. corresponden a todas las características técnicas más modernas establecidas por los fabricantes de los vehículos. DELGROSSO S.p.A. garantiza la calidad y el resultado técnico de cada filtro CLEAN y toma la responsabilidad de daños eventuales que puedan atribuirse directamente a malo funcionamiento de los filtros, siempre que las instrucciones de montaje sean seguidas con cuidado. Con el fin de aplicar las leyes europeas que se refieren a la responsabilidad contra accidentes, DELGROSSO S.p.A. cubre todos sus filtros con un seguro de la empresa TORO ASSICURAZIONI contra todos daños en la eventualidad de reclamaciones contra los productos de DELGROSSO S.p.A. En la eventualidad de problemas provocados por los filtros CLEAN se necesita una relación técnica sobre los daños ocurridos, junto a la devolución a DELGROSSO S.p.A. de los filtros objeto de contestación para permitir a nuestro laboratorio técnico de efectuar las necesarias averiguaciones y por consiguiente dar instrucciones a la compañía de seguros. La falta de estos elementos no obliga o lleva responsabilidad a DELGROSSO S.p.A. sus agentes o representantes.

RUS Все фильтры произведены в DELGROSSO S.p.A. соответствуют всем самым новым спецификациям, установленным производителями транспортных средств. DELGROSSO S.p.A. гарантирует качество и технический результат каждого фильтра и берет на себя ответственность за любой ущерб, который может быть непосредственно отнесен к неисправности фильтров, при условии, что инструкции по установке проводятся правильно. В целях реализации европейских законов, которые относятся к гражданско-правовой ответственности от несчастных случаев, DELGROSSO S.p.A. охватывает все произведенные фильтры и все убытки в случае жалоб на продукции DELGROSSO S.p.A. страхового полиса компании TORO ASSICURAZIONI.

В случае проблем, связанных с фильтрами CLEAN необходимо послать технический отчет о причиненном ущербе, вместе с возвращением спорного фильтра, чтобы дать возможность нашей лаборатории выполнения технических осмотров и если нужно, отправить их компании страхования. Отсутствие любой из этих элементов не обязывает и не считает ответственной DELGROSSO S.p.A. его агентов или представителей.
